CONTENTS OF VOLUME 246

NUMBER 1, APRIL 1986

COMMUNICATIONS

Mouse α_1-Protease Inhibitor Is Not an Acute Phase Reactant
Heinz Baumann, Jean J. Latimer, and Marija D. Glibetic 488

Mg^{2+} Is Bound to Glutamine Synthetase Extracted from Bovine or Ovine Brain in the Presence of L-Methionine-*S*-sulfoximine Phosphate
Michael R. Maurizi, Harold B. Pinkofsky, Patrick J. McFarland, and Ann Ginsburg 494

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Characterization of the Reduction of 3-Acetylpyridine Adenine Dinucleotide Phosphate by Benzyl Alcohol Catalyzed by Aldose Reductase
Brenda Walker Griffin and Loretta G. McNatt 75

Interaction of Myotoxin *a* with the Ca^{2+}-ATPase of Skeletal Muscle Sarcoplasmic Reticulum
Pompeo Volpe, Ernesto Damiani, Andreas Maurer, and Anthony T. Tu 90

Studies on Thylakoid Phosphorylation and Noncyclic Electron Transport
Robert C. Jennings and Giuseppe Zucchelli 108

Role of Molecular Oxygen in Lignin Peroxidase Reactions
V. Renganathan, Keiji Miki, and Michael H. Gold 155

Aggregation and Proton Release of Purple and White Membranes following Cleavage of the Carboxyl-Terminal Tail of Bacteriorhodopsin
Bernard Arrio, Georges Johannin, Pierre Volfin, Marcelle Lefort-Tran, Lester Packer, A. Edward Robinson, and Eva Hrabeta 185

Study of the Electrokinetic Properties of Reconstituted Sarcoplasmic Reticulum Vesicles *Daniel Brèthes, Didier Dulon, Georges Johannin, Bernard Arrio, Thaddée Gulik-Krzywicki, and Jean Chevallier* 355

A New Membrane-Bound *b*-Type Cytochrome, Cytochrome *b*-558, from Photosynthetically Grown *Rhodopseudomonas sphaeroides*
Koh Iba and Ken-Ichiro Takamiya 391

Hydroperoxide Metabolism in Cyanobacteria
Elisha Tel-Or, Margaret E. Huflejt, and Lester Packer 396

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Activation of Spinach Chloroplast NADP-Linked Glyceraldehyde-3-phosphate Dehydrogenase by Concerted Hysteresis
Ricardo A. Wolosiuk, Cecilia M. Hertig, and Liliana Busconi 1

Isolation of Rat Liver Microsomal Short-Chain β-Ketoacyl-Coenzyme A Reductase and *trans*-2-Enoyl-Coenzyme A Hydratase: Evidence for More than One Hydratase
Lynda Cook, M. Renuka Prasad, William R. Cook, and Dominick L. Cinti 206

Phosphorylated Threonine as the Covalent Intermediate in Snake Venom Phosphodiesterase *Jeffrey S. Culp and Larry G. Butler* 245
Reversion Reactions of β-Galactosidase (*Escherichia coli*) *R. E. Huber and K. L. Hurlburt* 411

GLYCOPROTEINS AND GLYCOLIPIDS

Regulation of α_1-Acid Glycoprotein Externalization and Intracellular Accumulation in Glucocorticoid-Induced Rat Hepatoma Cells *Omar K. Haffar, Caroline P. Edwards, and Gary L. Firestone* 449

HORMONE STRUCTURE AND FUNCTION

Intracellular Location of Unoccupied 1,25-Dihydroxyvitamin D Receptors: A Nuclear-Cytoplasmic Equilibrium *Sandra N. Walters, Timothy A. Reinhardt, Mark A. Dominick, Ronald L. Horst, and E. Travis Littledike* 366

LIPIDS AND PROSTAGLANDINS

Metabolism of Platelet-Activating Factor (1-*O*-Alkyl-2-acetyl-*sn*-glycero-3-phosphocholine) in Human Fetal Membranes and Decidua Vera *Chiaki Ban, M. Motasim Billah, C. Thien Truong, and John M. Johnston* 9
Phospholipid Metabolism in Human Neutrophil Subfractions *Duane M. Smith, Jr., and Moseley Waite* 263

MEMBRANES, CELL SURFACES, AND RECEPTORS

Covalent Crosslinking of Thyrotropin to Thyroid Plasma Membrane Receptors: Subunit Composition of the Thyrotropin Receptor *Robert McQuade, Colin G. Thomas, Jr., and Shihadeh N. Nayfeh* 52
Properties of the 23,000-Da Phosphoproteins in Cardiac Sarcolemma and Sarcoplasmic Reticulum *Charles F. Louis, Margaret Hogan, and Janet Turnquist* 98
Calmodulin Inhibits the Phosphorylation of Spectrin *in Vitro* *Dieter Maretzki and Hans U. Lutz* 469

NEUROCHEMISTRY

Characterization of Rat Brain Microsomal Acyl-Coenzyme A Ligases: Different Enzymes for the Synthesis of Palmitoyl-Coenzyme A and Lignoceroyl-Coenzyme A *Alok Bhushan, Rajinder Pal Singh, and Inderjit Singh* 374

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Active Site Mechanics of Liver Microsomal Cytochrome *P*-450 *Ronald E. White and Mary-Beth McCarthy* 19
The Influence of Side Chain Modifications of the Heme Moiety on Prosthetic Acceptance and Function of Rat Hepatic Cytochrome *P*-450 and Tryptophan Pyrrolase *Lester M. Bornheim, Daniel W. Parish, Kevin M. Smith, David A. Litman, and Maria Almira Correia* 63

The Effect of Substrate on the Expression of Activity Catalyzed by Cytochrome *P*-450: Metabolism Mediated by Rabbit Isozyme 6 in Pulmonary Microsomal and Reconstituted Monooxygenase Systems
Barbara A. Domin and Richard M. Philpot 128
Regulation of Cytochrome *P*-450*c* by Glucocorticoids and Polycyclic Aromatic Hydrocarbons in Cultured Fetal Rat Hepatocytes *J. Michael Mathis, Russell A. Prough, Ronald N. Hines, Edward Bresnick, and Evan R. Simpson* 439
Metabolic and Stereoselective Formations of Non-K-region Benz[*a*]anthracene 8,9- and 10,11-Epoxides
Mohammad Mushtaq, Henri B. Weems, and Shen K. Yang 478

PHYSICAL BIOCHEMISTRY

Association Constants for the Interaction of Double-Stranded and Single-Stranded DNA with Spermine, Spermidine, Putrescine, Diaminopropane, N^1- and N^8-Acetylspermidine, and Magnesium: Determination from Analysis of the Broadening of Thermal Denaturation Curves
James E. Morgan, James W. Blankenship, and Harry R. Matthews 225

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

Race:Cultivar-Specific Induction of Enzymes Related to Phytoalexin Biosynthesis in Soybean Roots following Infection with *Phytophthora megasperma* f. sp. *glycinea*
Anne Bonhoff, Rosemarie Loyal, Jürgen Ebel, and Hans Grisebach 149
^{13}C-NMR Evidence of Bacteriochlorophyll *a* Formation by the C_5 Pathway in *Chromatium* *Tamiko Oh-hama, Haruo Seto, and Shigetoh Miyachi* 192
Oscillations in Levels of Metabolites from the Photosynthetic Carbon Reduction Cycle in Spinach Leaf Disks Generated by the Transition from Air to 5% CO_2 *Robert T. Furbank and Christine H. Foyer* 240
Use of Monoclonal Antibodies for the Purification and Characterization of the Threonine-Sensitive Isozyme of Maize Homoserine Dehydrogenase
Sriram Krishnaswamy and John K. Bryan 250
Partial Purification and Characterization of Two Forms of Malonyl-Coenzyme A: Acyl Carrier Protein Transacylase from Soybean Leaf Tissue
Daniel J. Guerra and John B. Ohlrogge 274
Protein Rotational Mobility in Thylakoid Membranes of Different Polypeptide Composition in the Wild Type and Mutant Strains of *Chlamydomonas reinhardtii* *A. Rousselet and F.-A. Wollman* 321
Regulation of Photorespiration in Leaves: Evidence That the Fraction of Ribulose Bisphosphate Oxygenated Is Conserved and Stoichiometry Fluctuates
Kenneth R. Hanson and Richard B. Peterson 332

PROTEIN STRUCTURE AND FUNCTION

Structure–Function Relationships in Heparin Cofactor II: Chemical Modification of Arginine and Tryptophan and Demonstration of a Two-Domain Structure
Frank C. Church, German B. Villanueva, and Michael J. Griffith 175
Reexamination of the Primary Structure of an Antitumor Protein, Neocarzinostatin *Kenji Kuromizu, Susumu Tsunasawa, Hiroshi Maeda, Okitoshi Abe, and Fumio Sakiyama* 199

The Interaction of Melittin with Calmodulin and Its Tryptic Fragments
R. F. Steiner, Leda Marshall, and Donna Needleman 286
Hexokinase A from Mammalian Brain: Comparative Peptide Mapping and Immunological Studies with Monoclonal Antibodies
Tito Ureta, Allen D. Smith, and John E. Wilson 419

PROTEIN SYNTHESIS AND POST-TRANSLATIONAL PROCESSING

β-D-Xyloside-Mediated Alteration in the Synthesis of Basement Membrane Proteoglycan *Steven R. Ledbetter and John R. Hassell* 403
Biosynthesis and Processing of a Variant Surface Glycoprotein from *Trypanosoma brucei brucei* *Kathleen A. Presper and Edward C. Heath* 460

PROTEOLYSIS AND PROTEIN TURNOVER

Immunological and Chemical Properties of Mouse α1-Protease Inhibitors
Salim A. Nathoo and Thomas H. Finlay 162
Proteolysis of the Calcium-Dependent Protease Inhibitor by Myocardial Calcium-Dependent Protease
Ronald L. Mellgren, Maura T. Mericle, and Richard D. Lane 233

REGULATION OF METABOLISM AND OF ENZYME ACTION

Regulation of Collagen Synthesis and mRNA Levels in Articular Cartilage of Scorbutic Guinea Pigs
Robert G. Spanheimer, Timothy A. Bird, and Beverly Peterkofsky 33
Coordinate Regulation of Collagen and Proteoglycan Synthesis in Costal Cartilage of Scorbutic and Acutely Fasted, Vitamin C-Supplemented Guinea Pigs
Timothy A. Bird, Robert G. Spanheimer, and Beverly Peterkofsky 42
Fatty Acid Inhibition of Hormonal Induction of Acetyl-Coenzyme A Carboxylase in Hepatocyte Monolayers *Lisa M. Salati and Steven D. Clarke* 82
Interaction of Oxamate with the Gluconeogenic Pathway in Rat Liver
Angeles Martin-Requero, Matilde S. Ayuso, and Roberto Parrilla 114
Inhibition of the Biosynthesis of Uroporphyrinogen and Heme in Rat Liver during Obstructive Jaundice Produced by Bile Duct Ligation
Walter N. Piper, James Tse, Emily M. Sadler, W. Russ Christenson, James L. Balk, and Masahiro Kohashi 143
In Vitro Inhibition of Carrot Chalcone Synthase by 3′-Nucleotidase: The Role of the 3′-Phosphate Group of Malonyl-Coenzyme A in Flavonoid Biosynthesis
Walter Hinderer and Hanns Ulrich Seitz 217
Rat Liver Uridine Diphosphate Glucose Dehydrogenase: Dual Mechanism of Regulation *in Vivo* *S. M. Kelkar* 301
Effect on Gluconeogenesis of Mutants Blocking Two Mitochondrial Transport Systems in the Yeast *Saccharomyces cerevisiae*
Christopher Wills, Tracy Martin, and Thomas Melham 306
Phosphatidylcholine Homeostasis in Phosphatidylethanolamine-Depleted *Tetrahymena* *Joseph Donald Smith* 347
Pigeon Liver Phosphoprotein Phosphatase: An Effective Activator of Pyruvate Dehydrogenase in Tissue Homogenates

Lois M. Hinman, Hanna Ksiezak-Reding, Andrea C. Baker, and John P. Blass 381
Regulation of Rat and Bovine Adrenal Metabolism of Polycyclic Aromatic Hydrocarbons by Adrenocorticotropin and 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
Michael J. Dibartolomeis, Maro Christou, and Colin R. Jefcoate 428

NUMBER 2, MAY 1, 1986

INVITED PAPER

Oxygen Free Radicals and Iron in Relation to Biology and Medicine: Some Problems and Concepts *Barry Halliwell and John M. C. Gutteridge* 501

COMMUNICATION

Voltage-Dependent Increase in Ionized Cytoplasmic Calcium in the L_6H_9 Muscle Cell Line Detected with Quin2
Amira Klip, Esther Mack, Toolsie Ramlal, and Denise Walker 865

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Intrinsic and Artifactual pH Buffering in Chloroplast Thylakoids
Valerie R. Pfister and Peter H. Homann 525
The Effect of pH on Yields of Hydroxyl Radicals Produced from Superoxide by Potential Biological Iron Chelators *Mark S. Baker and Janusz M. Gebicki* 581
Oxidative Stress Impairs the Function of Sarcoplasmic Reticulum by Oxidation of Sulfhydryl Groups in the Ca^{2+}-ATPase
Nancy M. Scherer and David W. Deamer 589
Increased Adenine Nucleotides in Liver Mitochondria after Mannoheptulose Injection *in Vivo* *Peter C. Tullson and June R. Aprille* 611
Sulfate-Dependent Iron Oxidation by *Thiobacillus ferrooxidans:* Characterization of a New EPR Detectable Electron Transport Component on the Reducing Side of Rusticyanin *Ian V. Fry, Norman Lazaroff, and Lester Packer* 650
Localization of L-Lactate Dehydrogenase in Mitochondria
Edward S. Kline, Richard B. Brandt, Jerome E. Laux, Stephen E. Spainhour, Edwin S. Higgins, Kenneth S. Rogers, Steven B. Tinsley, and Michael G. Waters 673
Uric Acid Protection of Nucleobases from Ozone-Induced Degradation
Jan Meadows and Robert C. Smith 838

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Purification and Properties of Acyl-CoA:1-acyl-*sn*-glycero-3-phosphocholine-*O*-acyltransferase from Bovine Brain Microsomes
Niren Deka, Grace Y. Sun, and Ron MacQuarrie 554
Functional Constituents of the Active Site of Human Neutrophil Collagenase
Kasim A. Mookhtiar, Frank Wang, and Harold E. Van Wart 645
Modification of Bovine Pancreatic Ribonuclease A with 6-Chloropurine Riboside
Juli Alonso, M. Victòria Nogués, and Claudi M. Cuchillo 681
Monoterpene Cyclases: Use of the Noncyclizable Substrate Analog 6,7-Dihydrogeranyl Pyrophosphate to Uncouple the Isomerization Step of the Coupled Isomerization–Cyclization Reaction *Carl J. Wheeler and Rodney Croteau* 733

Structural Features Facilitating the Glutamate Dehydrogenase Catalyzed α-Imino Acid–α-Amino Acid Interconversion *R. Srinivasan and Harvey F. Fisher* 743
Induction of Refractoriness of Cyclic AMP Responses to Prostaglandin E_1 and Epinephrine by Prior Exposure of Guinea Pig Macrophages to Lipopolysaccharide *Kaoru Hazeki, Yoki Mori, and Michio Ui* 772

GLYCOPROTEINS AND GLYCOLIPIDS

Globoseries Glycosphingolipids of Human Meconium *Göran Larson* 531
Proteoglycan Synthesis in Suspension Cultures of Swarm Rat Chondrosarcoma Chondrocytes and Inhibition by Exogenous Hyaluronate *Mohinder K. Bansal, Hester Ward, and Roger M. Mason* 602
Immunochemistry of the Lewis Blood-Group System: Isolation and Structures of Lewis-c Active and Related Glycosphingolipids from the Plasma of Blood-Group O Le(a—b—) Nonsecretors *Peter Hanfland, Maria Kordowicz, Jasna Peter-Katalinic, Gerhard Pfannschmidt, Robert J. Crawford, Henry A. Graham, and Heinz Egge* 655
Studies on Properties of Membrane-Associated Oligosaccharyltransferase Using an Active Site-Directed Photoaffinity Probe *Joseph K. Welply, Howard A. Kaplan, Ponniah Shenbagamurthi, Fred Naider, and William J. Lennarz* 808

LIPIDS AND PROSTAGLANDINS

Calmodulin-Independent Inhibition of Platelet Phospholipase A_2 by Calmodulin Antagonists *Tsuyoshi Watanabe, Yoshiaki Hashimoto, Tamio Teramoto, Shoji Kume, Chikayuki Naito, and Hiroshi Oka* 699
Characterization of 1-*O*-Alkyl-2-acetyl-*sn*-glycero-3-phosphocholine (AGEPC)-Induced Protein Phosphorylation in Rabbit Platelets: Inhibitory Effects of AGEPC Analogs *Junko Sugatani and Donald J. Hanahan* 855

MEMBRANES, CELL SURFACES, AND RECEPTORS

Energetic Studies of Lactose Active Transport in *Escherichia coli* Membrane Vesicles *Ling-I Shirley Chen and Chang-Hwei Chen* 515
Myoinositol Uptake by Four Cultured Mammalian Cell Lines *Mark A. Yorek, Joyce A. Dunlap, and Barry H. Ginsberg* 801

MOLECULAR GENETICS, DEVELOPMENTAL BIOCHEMISTRY, AND DIFFERENTIATION

Specific DNA Alkylation Damage and Its Repair in Carcinogen-Treated Rat Liver and Brain *Altaf A. Wani and Steven M. D'Ambrosio* 690
Inhibition of Methylation of DNA and tRNA by Adenosine in an Adenosine-Sensitive Mutant of the Baby Hamster Kidney Cell Line *M. A. Skinner, H. J. Ho, and V. L. Chan* 725
Yeast Class III Gene Transcription Factors and Homologous RNA Polymerase III Form Ternary Transcription Complexes Stable to Disruption by *N*-Lauroylsarcosine (Sarcosyl) *Mark S. Klekamp and P. Anthony Weil* 783
The 3′-Noncoding Region of the Chick Myosin Light-Chain Gene Hybridizes to a Family of Repetitive Sequences in the Slime Mold *Dictyostelium discoideum* *David R. Shaw, Pramod Khandekar, M. A. Q. Siddiqui, and Herbert L. Ennis* 829

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Evidence That Isoniazid and Ethanol Induce the Same Microsomal Cytochrome *P*-450 in Rat Liver, an Isozyme Homologous to Rabbit Liver Cytochrome *P*-450 Isozyme 3a
Dene E. Ryan, Dennis R. Koop, Paul E. Thomas, Minor J. Coon, and Wayne Levin 633

PHYSICAL BIOCHEMISTRY

Synthesis and Properties of Adenosine-5′-triphosphoro-γ-1-(5-sulfonic acid)-naphthyl Ethylamidate: A Fluorescent Nucleotide Substrate for DNA-Dependent RNA Polymerase from *Escherichia coli*
Felicia Y.-H. Wu, A. W. Abdulwajid, and Daniel Solaiman 564

Effect of the Conformation of Concanavalin A on Its Affinity for Manganous Ion
Alkis J. Sophianopoulos and Judy A. Sophianopoulos 572

Glutaryl Phosphatidylcholine Effects on pH and Composition Dependent Behavior of Liposomes Studied by Spin-Labeling Method
Nicole Dousset, Guy Ferre, Michel Massol, and Louis Douste-Blazy 716

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

Modification of an Essential Amino Group of Phosphoenolpyruvate Carboxylase from Maize Leaves by Pyridoxal Phosphate and by Pyridoxal Phosphate-Sensitized Photooxidation
Florencio E. Podesta, Alberto A. Iglesias, and Carlos S. Andreo 546

Chorismate Mutase Isoenzymes from *Sorghum Bicolor:* Immunological Characterization
Bijay K. Singh and Eric E. Conn 617

PROTEIN STRUCTURE AND FUNCTION

Evidence for and Partial Characterization of Three Major and Three Minor Chromatographic Forms of Human Neutrophil Myeloperoxidase
Kenneth T. Miyasaki, Mark E. Wilson, Elias Cohen, Pamela C. Jones, and Robert J. Genco 751

Effect of Ethanol on Tropomyosin in Solution and in Reconstituted Thin Filaments
Yoshiharu Ishii, Sherwin S. Lehrer, S. Tsuyoshi Ohnishi, and Emanuel Rubin 765

Purification and Characterization of the Major Whey Proteins from the Milks of the Bottlenose Dolphin (*Tursiops truncatus*), the Florida Manatee (*Trichechus manatus latirostris*), and the Beagle (*Canis familiaris*)
Syed Pervaiz and Keith Brew 846

PROTEIN SYNTHESIS AND POST-TRANSLATIONAL PROCESSING

A Wheat Germ Cap-Site Factor Functional in Protein Chain Initiation
S. N. Seal, A. Schmidt, A. Marcus, I. Edery, and N. Sonenberg 710

REGULATION OF METABOLISM AND OF ENZYME ACTION

Adenylylation State of Glutamine Synthetase and Permeability Properties of *Pseudomonas fluorescens*
Jean-Marie Meyer and Earl R. Stadtman 622

Effect of Growth Hormone on Fatty Acid Oxidation: Growth Hormone Increases the Activity of 2,4-Dienoyl-CoA Reductase in Mitochondria
Sanda Clejan and Horst Schulz 820

AUTHOR INDEX FOR VOLUME 246 872

The Subject Index for Volume 246 will appear in the December 1986 issue as part of a cumulative index for the year 1986.

Digitized by the Internet Archive
in 2026

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1980. Please note the following examples.

1. Jones, J. B., Dilworth, G. L., and Stadtman, T. C. (1979) *Arch. Biochem. Biophys.* **195,** 255–260.
2. Metzler, D. E. (1977) Biochemistry: The Chemical Reaction of Living Cells, p. 298, Academic Press, New York.
3. Harrington, W. F. (1979) *in* The Proteins (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246–409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
